The Packages

Record with confidence – we'll handle the technical side. SpacePod sessions include a quick setup and sound check, with support for mic placement, levels. After you wrap, our post-production turns your raw recording into a polished episode: clean audio, balanced tone, tighter edits, and platform-ready loudness. For video, we sync and refine footage with multi-cam switching (if needed), light colour correction, and exports formatted for YouTube and socials.

*Bespoke packages are available
